

HireSmart

**Smart Internship and Job
Preparation System**

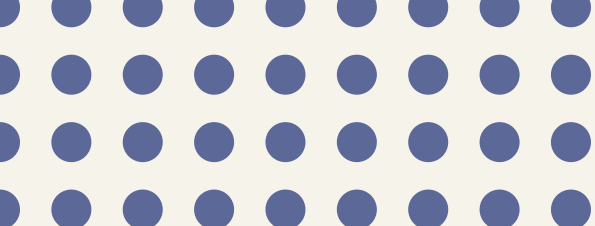

ITPM_B2_57

Background

- Companies receive a large number of CVs
- Filtering is difficult and time-consuming.
- CVs do not always reflect real skills.
- Companies may miss real talent.

Problems

- Recruitment process is not fully skill-based
- Takes too much time to filter candidates.
- Students are rejected without skill-based evaluation.

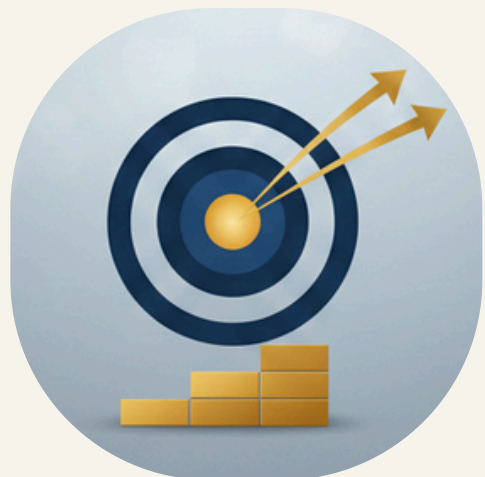

Motivation

- Smarter and Fairer system.
 - Select candidates based on their skill
 - Reduce company workload.
 - Give students fair opportunity.
 - Integrate AI for smart evaluation.
 - Improve university-to-industry bridge.
- 

Aim

Our aim is to develop an AI-powered platform that filters candidates through smart screening exams and prepares selected students for interviews.

Objectives

- Provide company & student registration
- Conduct secure online exams
- Use AI for evaluation and candidate filtering
- Prepare selected candidates for interviews through role-based quizzes.

Literature Review

- LinkedIn / Indeed – Focus mainly on CV filtering

- HackerRank – Focus on technical (baisc) skill tests
- AI Recruitment Systems – Use AI for resume screening

Our Contribution:

Our system combines these with AI evaluation, secure screening, and interview preparation in one complete system.

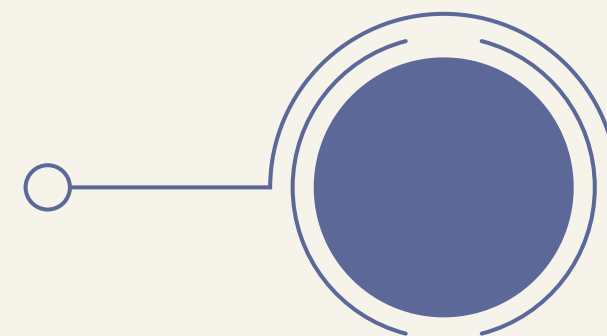

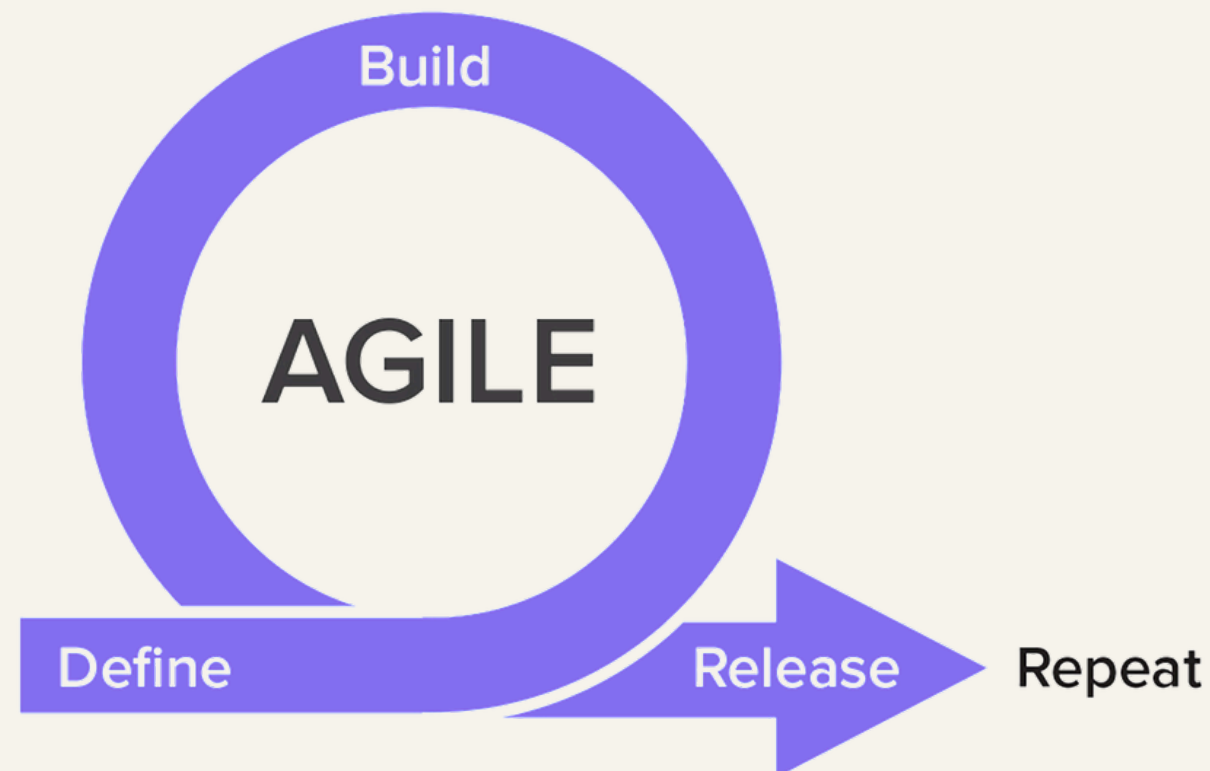

Methodology

- Agile approach
- System is divided into four modules
- developed step by step with continuous testing.
- Sprint-based development

AI part works:

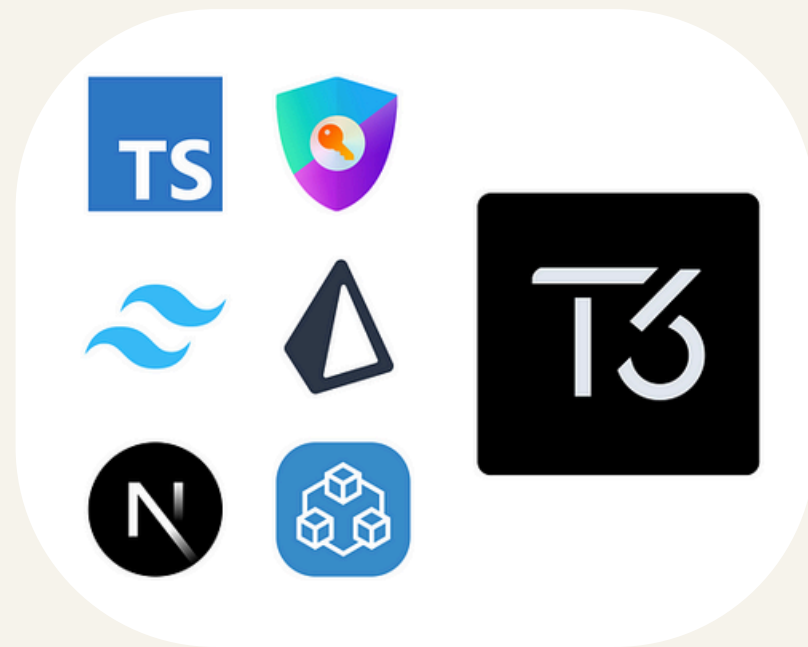

- Pre-created questions
- AI generates scenario-based questions dynamically
- AI evaluates answers
- Compare with cutoff

Tools and Technologies

Why T3 stack:

- Full-stack type safety
- Fast development
- Scalable
- Modern industry stack

Frontend:

- Next.js
- TypeScript
- Tailwind CSS

AI Integration:

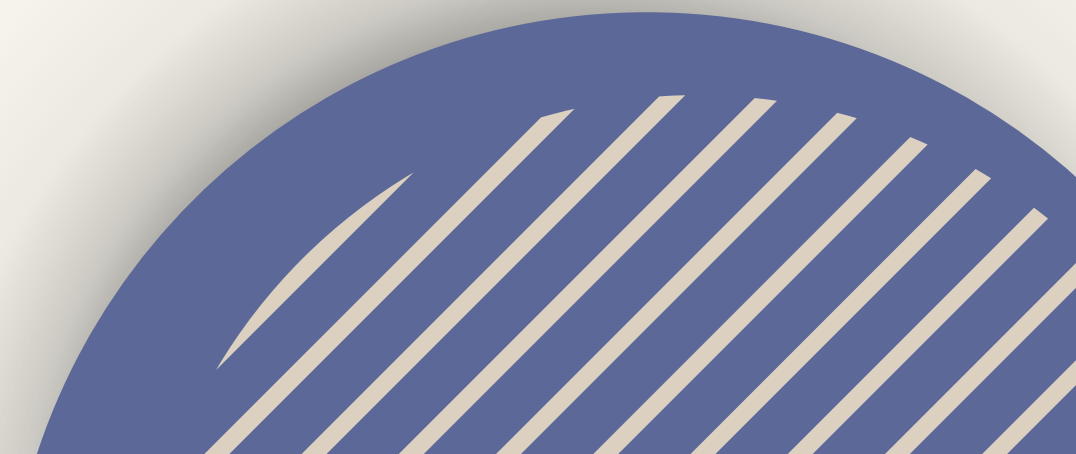

- OpenAI API (or similar)
- Dynamic question generation

Backend:

- tRPC
- Prisma ORM
- SQLite

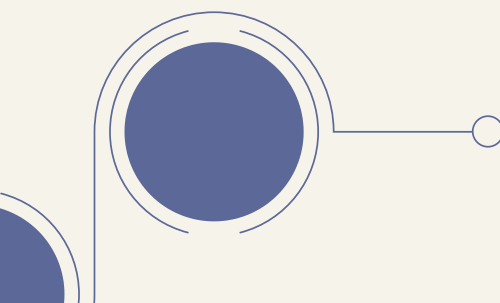

Security:

- Block mode exam
- Tab-switch detection

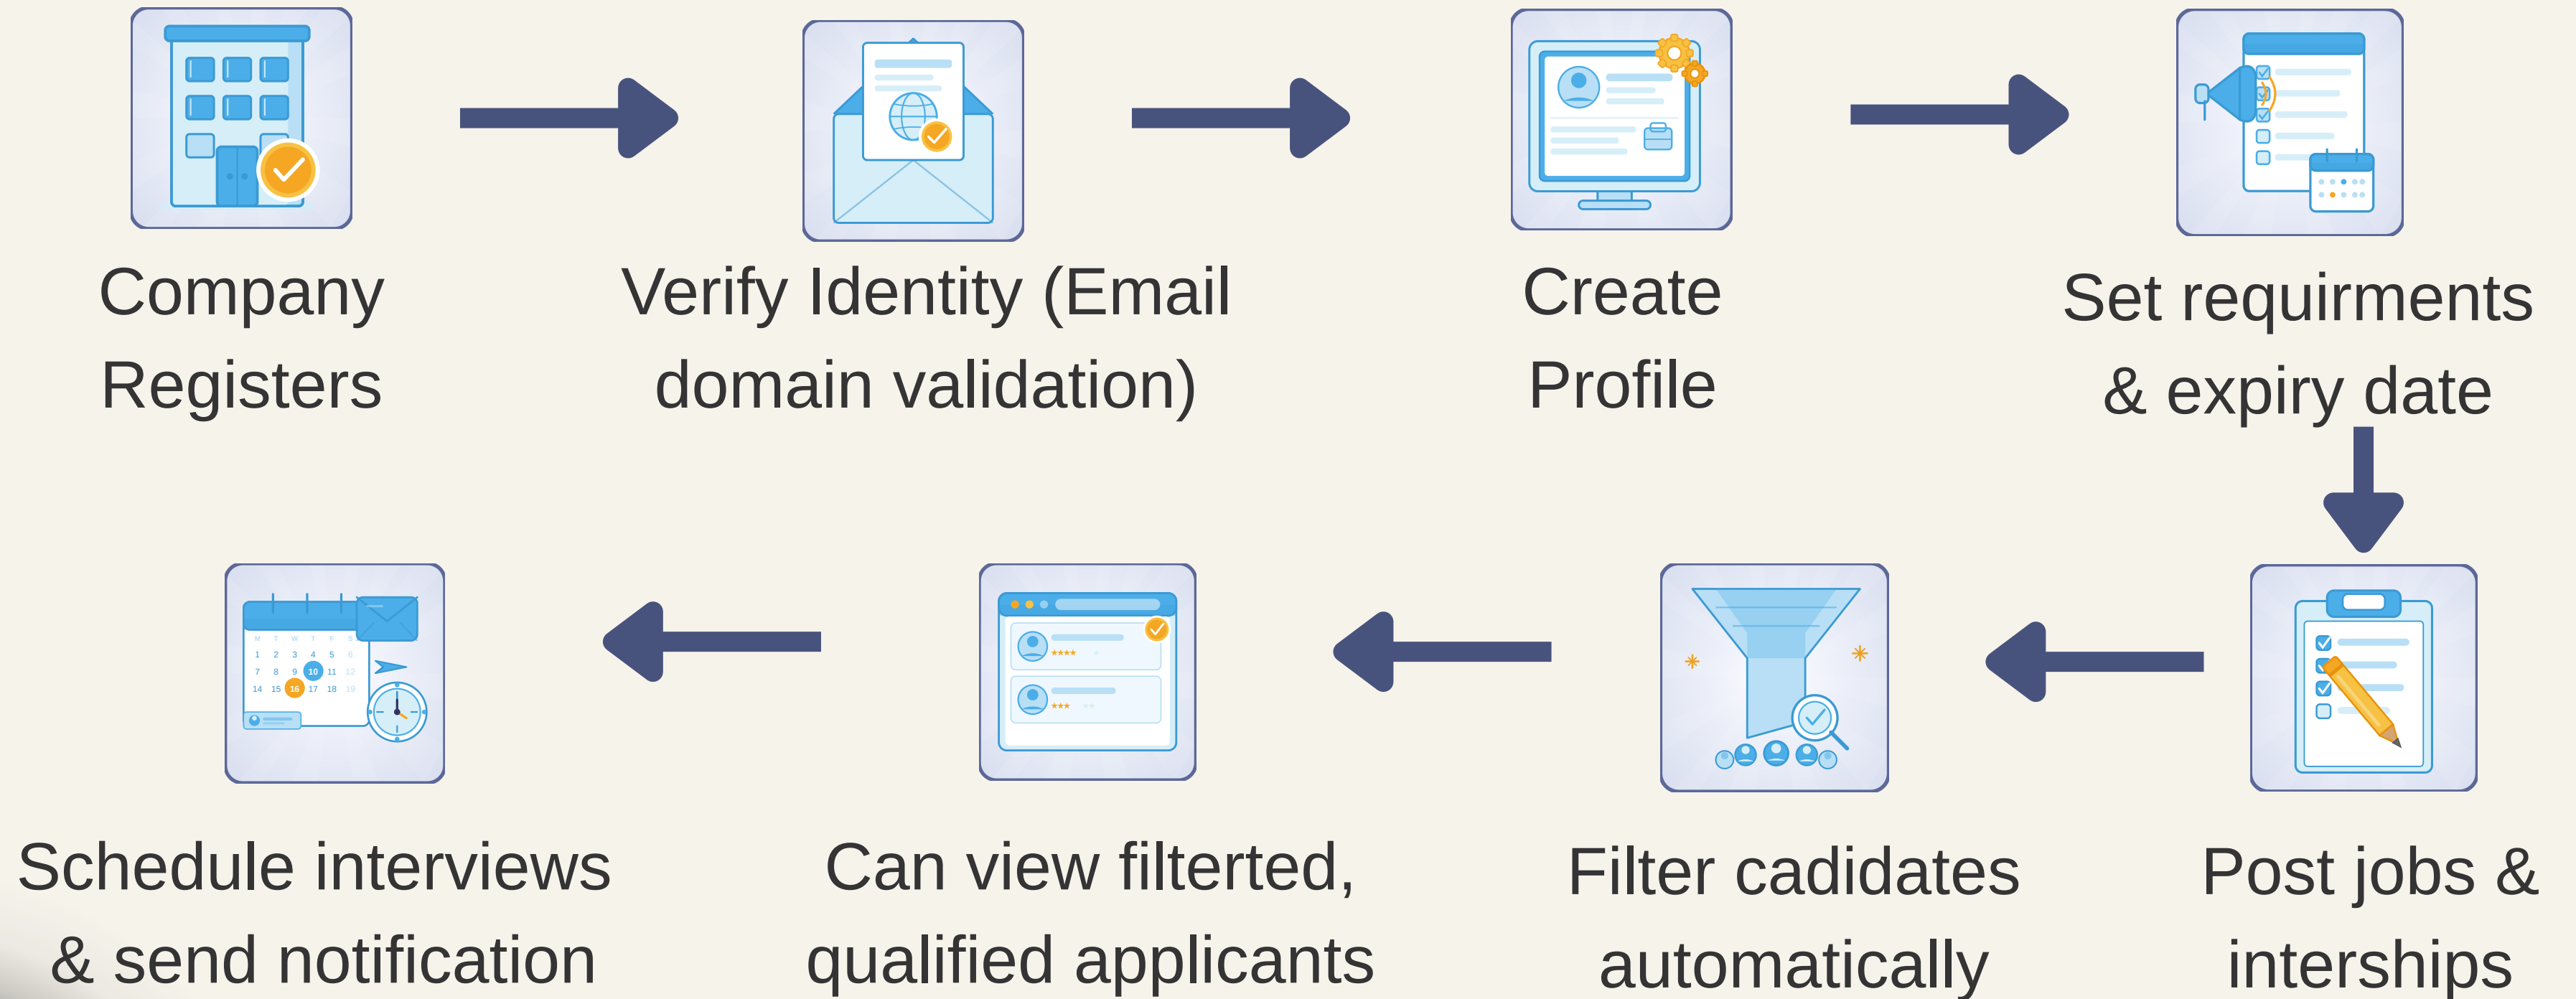

Features of HireSmart

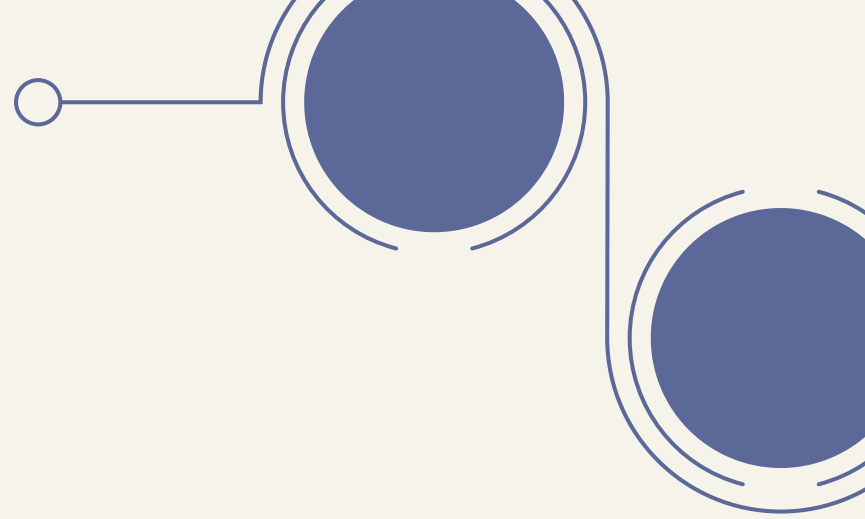

01. Company Registration & Job Management

Key Functions

- Handles company registration and verification
- Create and manage company profiles
- Create and manage job and internship posts with specific requirements
- Display only filtered and qualified applicants
- Schedule interviews and send notifications

Benefits

- Do not need to review hundreds of CVs
- Only see suitable and qualified candidates
- Saves time and makes the recruitment process faster and more efficient.
- Ensures verified and trusted company accounts

02. Student Registration & Interview Preparation

Why We Need Student Management & Interview Preparation

- Allow students to securely register and access the platform.
- Maintain updated student profiles with skills and experience.
- Help students easily find available jobs and internships.
- Provide interview preparation through role-based quizzes.
- Track student performance and learning progress.

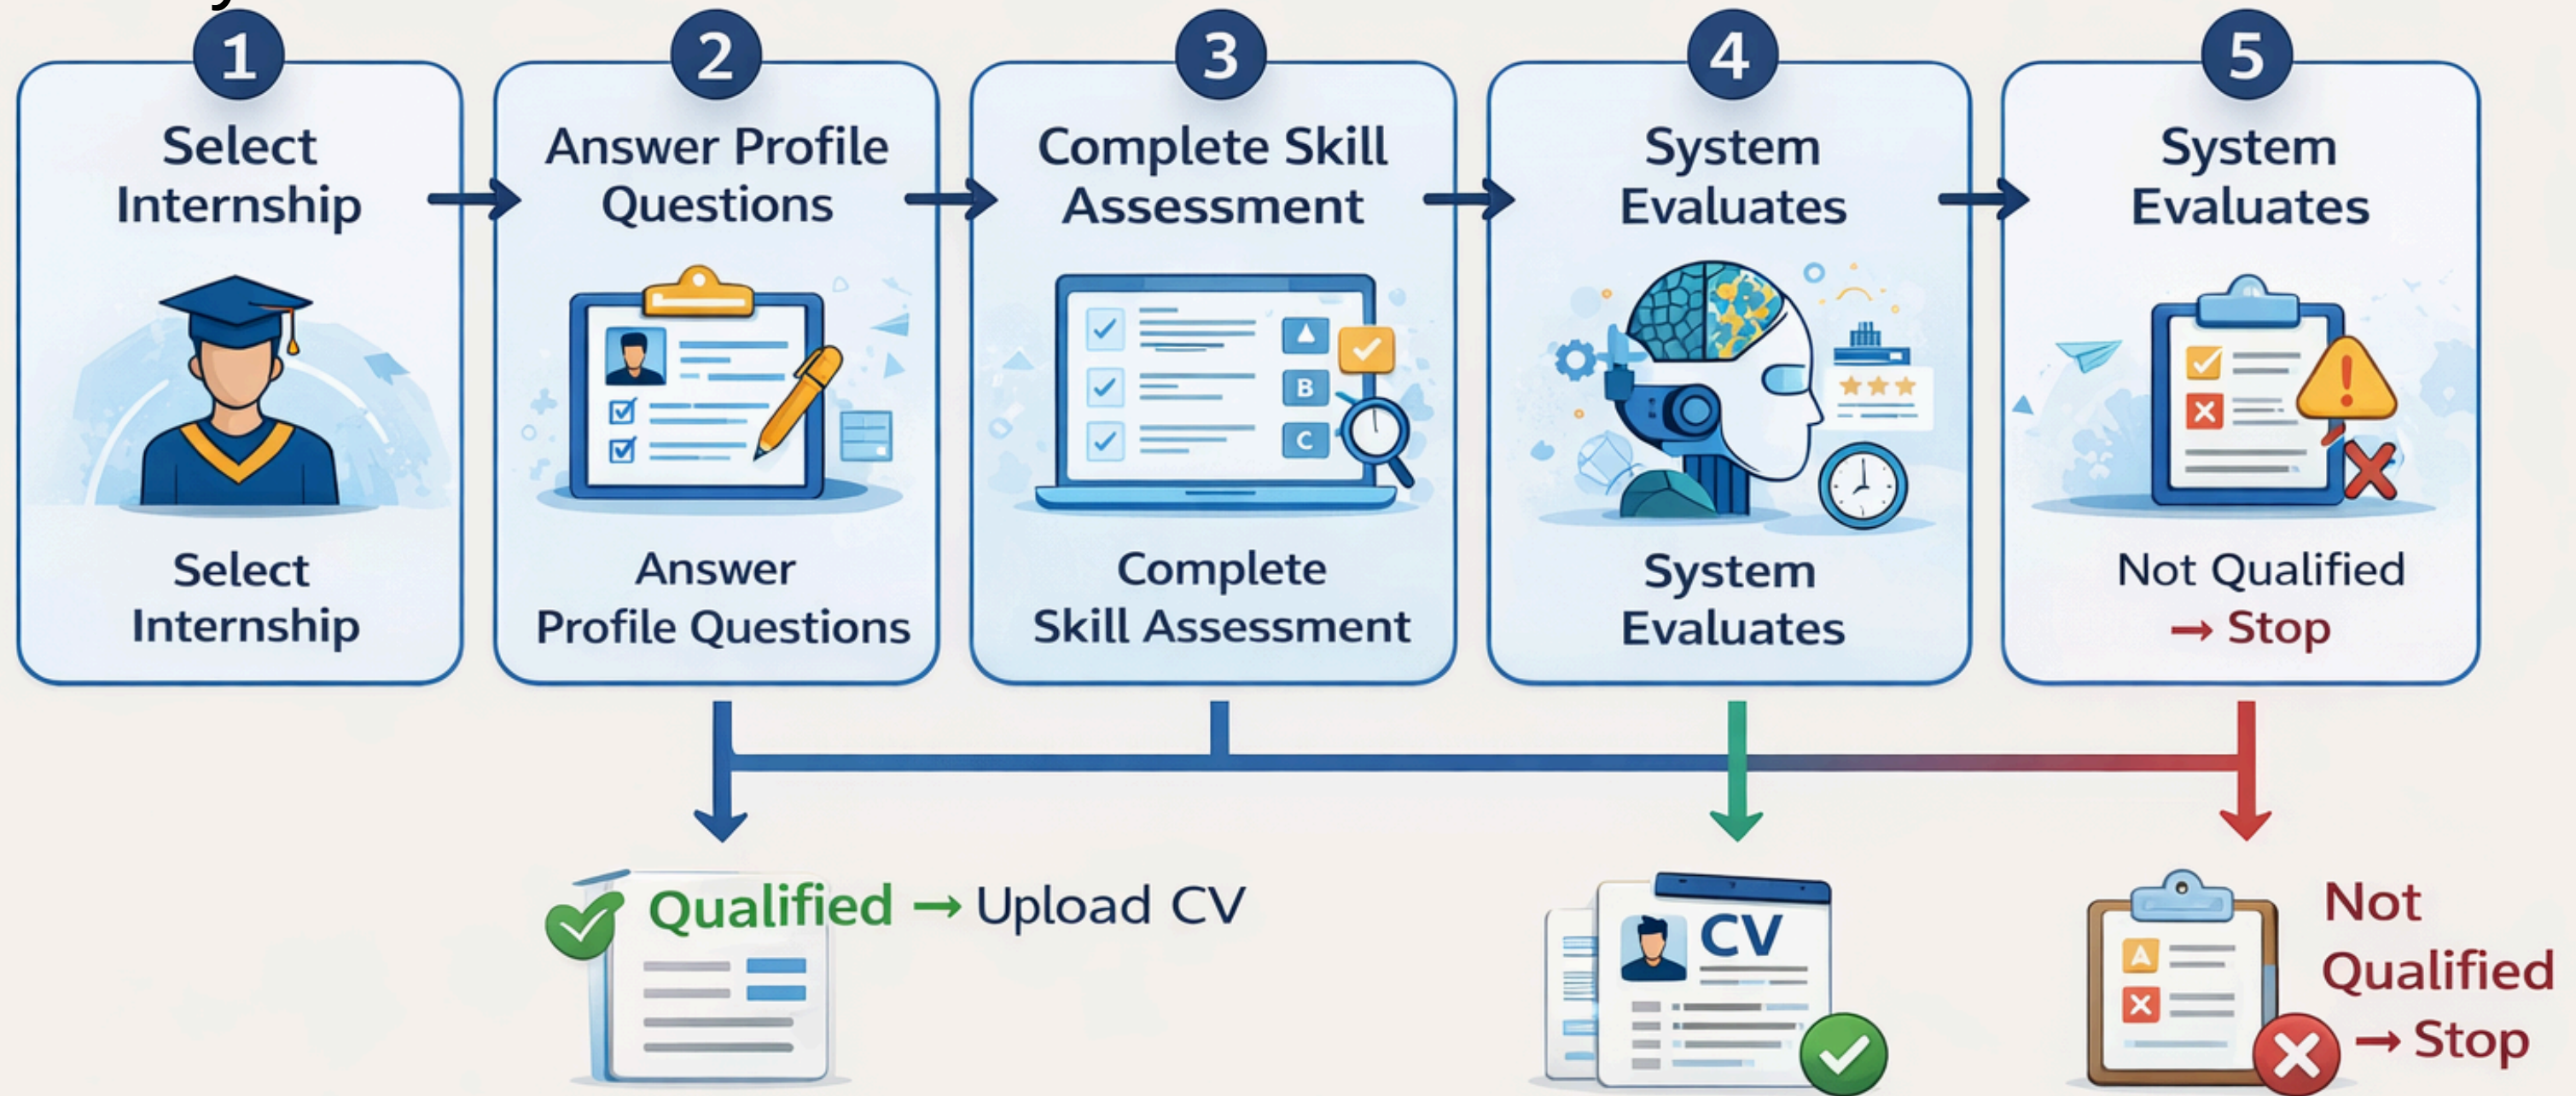

Benefits of Student Registration & Interview Preparation Module

- ✓ Enhances student interview preparation through role-based quizzes.
- ✓ Improves technical and problem-solving skills before interviews.
- ✓ Helps students identify strengths and skill gaps.
- ✓ Tracks preparation progress and performance improvement.
- ✓ Increases confidence and success in real interviews.

03. Online Exam & Question Management Module

What the system Does

What Our System Collects

5 Key Data Points Collected from Applicants

EDU Education & Background

Degree, university, GPA & academic history

TECH Technical & Tool Skills

Languages, frameworks & software proficiency

EXP Project & Experience

Portfolio, internships &

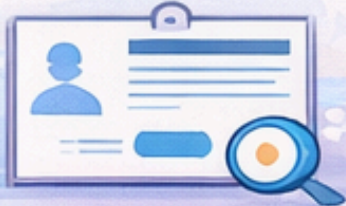

Q&A Scenario-Based Responses

Real-world problem-solving answers

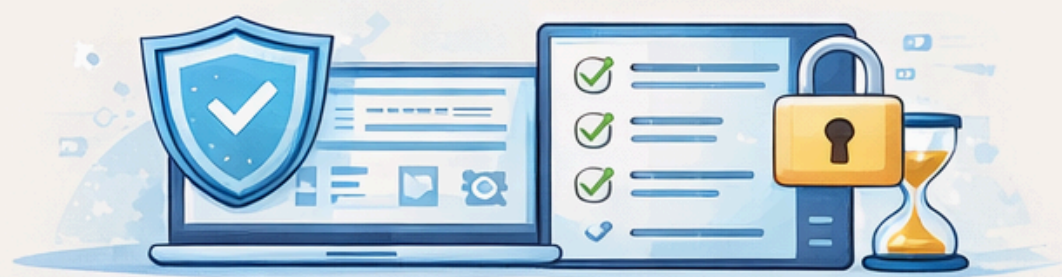

ROLE Role-Based Questions

Targeted questions per internship role applied

Smart Pre-Screening System

Secure Block Mode & Exam Rules

- ✓ Fullscreen enforced exam mode
- ✓ Tab switching detection
- ✓ Copy / paste restriction
- ✓ Violation tracking system
- ✓ Auto-termination after limit
- ✓ Time limit & attempt control

Role-Based Question Bank & Skill Assessment

- ✓ Role-specific question bank (SE, UI/UX, PM, etc.)
- ✓ Categorized by topic and difficulty
- ✓ Randomized question selection
- ✓ Scenario-based & skill-based questions

Why This Is Important ?

It ensures
candidates are
filtered based on
actual skills,
not just CV content.

Fair

All candidates assessed the
same way

Efficiency

HR only reviews pre -qualified
talent

Reliable

Real Skills Tested in Real Time

04.AI Evaluation & Candidate Filtering Module

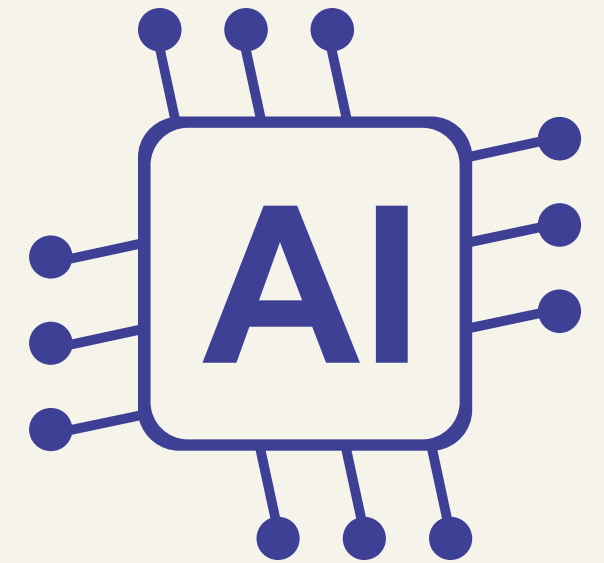

Why We Need the AI Evaluation & Candidate Filtering Module

To evaluate answers with different wording

The AI automatically filters out

To accelerate the overall recruitment process

To provide a highly refined candidate pool

Benefits of AI Evaluation & Candidate Filtering Module

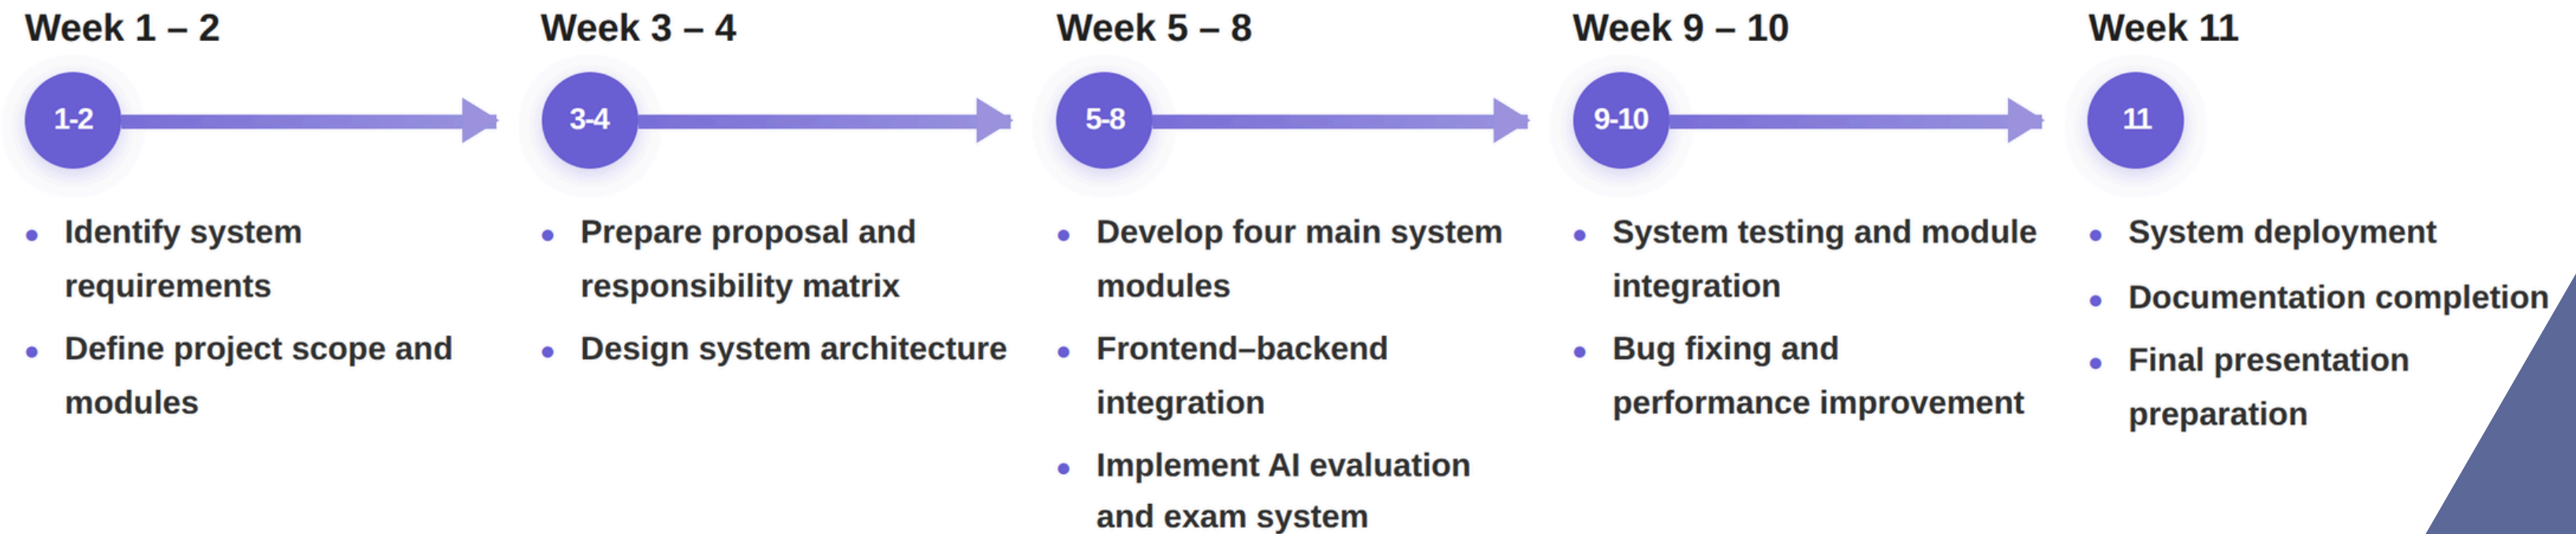

Automated and Fair Evaluation - intelligence and automation

Handling Semantic Variations - recognize different wording

Intelligent Candidate Filtering- filters the best students for companies

Skill-Based Selection- recruitment process fair and skill-based

PROJECT PLAN

Conclusion

- Introduces a skill-based recruitment platform using AI evaluation.
 - Companies can view only qualified candidates without reviewing many CVs.
 - Students become interview-ready through role-based preparation quizzes.
 - Ensures a fair, secure, and efficient recruitment process.
 - Bridges the gap between university students and industry opportunities.
- 

THANK YOU
